

ProfiDent Abrasive Steel Strips

Description

Stainless steel strips for removal of excess material and interproximal polishing of ceramic, composite and amalgam fillings. With galvanically bonded aluminium oxide. Coated on one side.

Application

The strips can be cut to the required length. The Steel separating strip is carefully introduced in the interdental space with a light oscillating move. Thereby the grinded side of the Steel separating strip has to point at the interdental area, which the dentist has to treat.

Properties

- coated on one side
- Length: 135 mm
- Grit: 60 μ
- Thickness: 0,15 mm

Form of delivery

REF 9042.04 4 mm, 12 pieces

REF 9042.06 6 mm, 12 pieces

REF 9042.08 8 mm, 12 pieces

Classification

Medical device, class I, rule 5,
